HIBA SIDINOU

STUDENT IN CYBER DEFENSE AND EMBEDDED TELECOMMUNICATION SYSTEMS ENGINEERING

hibasidinou2@gmail.com | +212 766 90 52 82 | https://github.com/hibasidinou | Oulfa Casablanca, Maroc

Profile

5th-year Cyber Defense engineering student at ENSA Marrakech, looking for a final-year (PFE) internship starting February 2027 in cybersecurity — governance, risk and compliance (GRC). Profile focused on compliance and security auditing, with hands-on experience applying security frameworks (CIS Benchmarks), deploying SOC tooling and securing networks. Passionate about cybersecurity, I combine technical rigor and a drive to learn to actively contribute to the protection of systems and data.

Education

École Nationale des Sciences Appliquées – Marrakech **2024 – present**
Engineering cycle – Cyber Defense and Embedded Telecommunication Systems

École Nationale des Sciences Appliquées – Beni Mellal **2022 – 2024**
Integrated Preparatory Classes – Honors (Assez Bien)

Baccalauréat in Mathematical Sciences – French option **2021 – 2022**

Professional Experience

PFA Internship – Holcim Maroc, Cybersecurity Department **Jul. – Aug. 2026**
- Assessed 825 CIS controls across Windows Server 2022, RHEL 9, SQL Server 2022 and MariaDB 10.11 using a weighted scoring method (security benefit, production impact, implementation difficulty).
- Ranked controls into three deployment waves; studied the CIS Kubernetes Benchmark (42 controls) at the CISO's request.
- Wrote IT and OT hardening referentials, work plans and progress reports.
- Built an automated compliance audit POC (CINC Auditor / InSpec); presented to the CISO and infrastructure teams.

AI & Python Instructor – Koding School **Oct. 2026 – present**
- Teach Python Foundations and AI Labs to children and teens (ages 7+).
- Design and deliver hands-on sessions introducing programming and AI through projects.
- Adapt complex technical topics to young learners.
- Collaborate with the other trainers to build and improve course material.

IT & Cybersecurity Intern – Exia Technologies, Casablanca **Jul. – Sep. 2025**
- Assessed Windows and Ubuntu security configuration against CIS Benchmarks; contributed to auditing and system hardening.
- Deployed Wazuh (manager, indexer, dashboard, agents) for security monitoring and event analysis.
- Automated security tasks with PowerShell and Bash.

Collaboration – EYACOM, GITEX Africa 2025 **2025**
- Technical support and presentation of a SOC solution.

Academic Projects

Hospital Mini-ERP – crisis module (ISO 22361:2022 workshop)
- Wrote the interface contract between the ERP and the crisis monitoring tool: JSON event format, severity levels (INFO/WARNING/CRITICAL), /health, /events and /status/degraded APIs.
- Mapped the contract to ISO 22361:2022 clauses (information management, shared situational awareness, response) and contributed to its implementation in the crisis module.

Apache Web Server Hardening
- Before/after scans (Nikto, Nmap, OWASP ZAP), hardening scripts, SSL certificate; measured attack surface reduction.

Android Attack Surface Mapper
- Risky pattern detection in APKs, attack surface risk score, automated recommendations.

Explainable AI-based Cyber Threat Detection (upcoming project)
- AI-based threat detection with explainability methods, so model decisions can be justified.

Technical Skills

Governance & compliance: CIS Benchmarks (Windows, Linux, SQL, Kubernetes), ISO 27001 (ISMS), ISO 27002, ISO 22361, auditing, security controls
Risk: Risk analysis and scoring, prioritization, business continuity
Audit & documentation: CINC Auditor / InSpec, Heimdall-lite, Word, Excel, PowerPoint, LaTeX
Technical: Linux/Unix, Windows Server, Wazuh, Lynis, Nessus, Nmap, Python, PowerShell, Bash, SQL, Git

Activities & Languages

Activities: Vice-President, Art & Design Club (ENSA) · Member, GCDSTE Cybersecurity Club · RootMe – Ethical hacking (in progress)
Languages: French: C1 · English: C1 · Spanish: B1 · Arabic: native
