HIBA SIDINOU

STUDENT IN CYBER DEFENSE AND EMBEDDED TELECOMMUNICATION SYSTEMS ENGINEERING

hibasidinou2@gmail.com | +212 766 90 52 82 | https://github.com/hibasidinou | Oulfa Casablanca, Maroc

Profile

5th-year Cyber Defense engineering student at ENSA Marrakech, looking for a final-year (PFE) internship starting February 2027 in cybersecurity — defensive security (SOC) or DevSecOps. Active-defense profile with hands-on experience in SOC deployment, DevSecOps and network security. Passionate about cybersecurity, I combine technical rigor and a drive to learn to actively contribute to the protection of systems and data.

Education

École Nationale des Sciences Appliquées – Marrakech **2024 – present**
Engineering cycle – Cyber Defense and Embedded Telecommunication Systems

École Nationale des Sciences Appliquées – Beni Mellal **2022 – 2024**
Integrated Preparatory Classes – Honors (Assez Bien)

Baccalauréat in Mathematical Sciences – French option **2021 – 2022**

Professional Experience

PFA Internship – Holcim Maroc, Cybersecurity Department **Jul. – Aug. 2026**
- Built an automated compliance audit with CINC Auditor / InSpec: SQL Server 2022 profile adapted from a MITRE baseline, MariaDB 10.11 profile written from scratch, results visualized in Heimdall-lite.
- Assessed 825 CIS controls (weighted scoring) across Windows Server 2022, RHEL 9, SQL Server 2022 and MariaDB 10.11, ranked into three deployment waves.
- Studied the CIS Kubernetes Benchmark (42 controls) at the CISO's request.

AI & Python Instructor – Koding School **Oct. 2026 – present**
- Teach Python Foundations and AI Labs to children and teens (ages 7+).
- Design and deliver hands-on sessions introducing programming and AI through projects.
- Collaborate with the other trainers to build and improve course material.

IT & Cybersecurity Intern – Exia Technologies, Casablanca **Jul. – Sep. 2025**
- Deployed and configured Wazuh (manager, indexer, dashboard) with agents on Windows (2019/2022) and Ubuntu Server; security monitoring and event analysis.
- Assessed Windows/Ubuntu security configuration against CIS Benchmarks and contributed to system hardening.
- Automated security tasks with PowerShell and Bash.

Collaboration – EYACOM, GITEX Africa 2025 **2025**
- Technical support and presentation of a SOC solution.

Academic Projects

DevSecOps Microservices Platform (Trivy · Kyverno · Falco)
- Full on-premise pipeline: SAST (Semgrep), Trivy image scanning, Harbor registry, hardened Kubernetes (RBAC, Kyverno), Prometheus/Grafana/Loki monitoring, Falco runtime detection.

Full SOC Deployment (TheHive · Cortex · MISP · Wazuh)
- SOC architecture on Docker Compose, Suricata/Zeek NIDS detection, Kali Linux attack simulation, incident handling and automated IoC checks.

Network Security with FortiGate (GNS3)
- FortiGate (NAT/DNAT, WAN/DMZ/LAN zones), Nginx reverse proxy, ModSecurity + OWASP CRS WAF, ELK logs; Nmap, Nikto, OWASP ZAP testing.

Malware Behavior Clustering
- Hybrid static/dynamic analysis, behavioral similarity clustering, 2D visualization and IOC generation.

Hospital Mini-ERP – crisis module (ISO 22361:2022 workshop)
- Wrote the interface contract between the ERP and the crisis monitoring tool (JSON events, severity levels, /health, /events, /status/ degraded APIs), aligned with ISO 22361, and contributed to its implementation.

Explainable AI-based Cyber Threat Detection (upcoming project)
- AI-based threat detection with explainability (XAI) methods.

Technical Skills

Defense & SOC: Wazuh, TheHive, Cortex, MISP, Suricata, Zeek, ELK, Lynis, malware analysis
DevSecOps: Docker, Kubernetes, Trivy, Kyverno, Falco, Semgrep, Harbor, Prometheus, Grafana, Loki, Git, InSpec
Network & web security: FortiGate, pfSense, GNS3, ModSecurity WAF, OWASP ZAP, Nmap, Nessus, Nikto, Kali Linux, Hashcat
Programming & scripting: Python, Java/JEE, PHP, JavaScript, SQL, PowerShell, Bash
Systems & frameworks: Linux/Unix, Windows Server, CIS Benchmarks, ISO 27001 (ISMS), ISO 27002, ISO 22361

Activities & Languages

Activities: Vice-President, Art & Design Club (ENSA) · Member, GCDSTE Cybersecurity Club · RootMe – Ethical hacking (in progress)
Languages: French: C1 · English: C1 · Spanish: B1 · Arabic: native
